FREE WOOL, COAL AND IRON ORE

Ready for Congress When it As-

Wassington, Nov. 15.—Despite the precautions of the house ways and means consulties to prevent its secrets becoming public property, some of the details of the work on the tariff bill are leaking out. There is apparently no doubt but that sool, coal and iron ore will be placed on the free list. It is underdood also that material reduction will stood also that material reduction will be made on steet rails. The duty on tin plate, as has been previously announced, will probably be reduced from 2 2-10 to 1 cent. The acheduies of textile fabrics have been substantially agreed upon, in accordance with the democrat theory of free care materials, and also reduced duties an manufactured goods. The modern disting will be similar to those in the Series of hell, not above 40 per cent the Springer bill, not above 40 per cent advalorem and at 25 per cent on only a few items. The rate on manufactures of coston will be about 40 per cent, in-cluding cotton besiery as well as fabrics. The duties on linen goods and lares will suffer a considerable reduction in tier of the fact that flax and the other raw materials of the industry are going upon

Linen May Be Saved. The representatives of the linen manufacturers have been beinging strong pressure to bear upon the commilities to maintain the existing duties, but the compound duties are likely to be abolished in every case and some of the mivalorem duties reduced. A meeting of all the democrat members of the committee will be held tomorrow at which the sub-committees having in charge the various schedules will sub-mit their reports. The work of situat-ing and harmonizing the reductions will then be continued until the bill shall have been completed. It is expected that this result will be reached the last of sext week or not later than Monday following. The bill will then be re-ported to the full committee and made ported to the tail committee and made public the same day. Chairman Wilson believes the bill will be taken up in the house and generally debated for about ten days preceding the holiday re-cess. Mr. Wilson will make the opening speech in support of the measure, and it is understood that Mr. Burrows of Michigan, one of the republican members of the committee, will speak first for his side. An effort will be made to close the general debate as quickly as possible in order that the house may proceed to consider the measure under the fire.

MITCHELL-CORBETT MILL It Will Take Place in Jacksonville January 25.

New York, Nov. 15.—Another mysterious meeting between the Mitchell-Corbett combination was held today and all final arrangements were made for the great prize fight to take place at Jacksonville. Brady's bot of \$1,000 that Mitchell would not appear in the ring against Corbett at the time appointed was promptly covered by Mitchell. They each put up security to the extent of \$5,000 for their appearance in the ring, and the amount is to be left in the hands of David Bianchard of Boshands of David Blanchard of Bos-ton. A side bet of 85,000 each was then made between them, which amount is to be placed in the hands of Al Smith of this city. In other words they have reduced their side bet of \$10,000 each, new in the hands of Blanchard, to \$5,000 each, and hands of Blanchard, to \$5,000 each, and will have him send \$10,000 of the \$20,000 he now holds to Al Smith and hold the other \$10,000 for the Florida people to guarantee their appearance in the ring. The date agreed upon for the fight is January 25, 1894.

Bosros, Mass. Nov. 15.—The post-ponement of the Alix-Directum race to-day was a great disappointment to every-body, as it is now generally admitted that it will be a wonder if the time de tomorrow is better than 2:11. With yesterday's bright outlook for good weather and splendid track the racers were expected to trot below 2:09 today, but now everything is changed. The hard rain of this afternoon continues drizzily and the cold air of the afternoon has combined to leave the track in a bad condition. If it was warm weather, the surface would un-doubtedly be in prime condition by tomorrow afternoon, but with the mercury down to freezing the track will not have a chance to dry off as it should for a trial of record breakers. Manager Willis, it is understood, will scrape the track tomorrow afternoon and remove the half such or more of mud on the top and every effort will be made to put the track in the best possible condition. At the best it will be heavy.

TWO OF THEM PLEAD

The Hogan's Withdraw Their Plea of Not Guilty

IN THE MINERAL RANGE CASE

The Peculiar Nature of the Case Made It Impossible to Convict

HOUGHTON, Mich., Nov. 15. - Upon the opening of court and the completion of the jury to try the train robbers this morning, the attorney for the Hogan brothers arese and announced to the court that they would change their plea from "not guilty" to "guilty" of larceny in the case of both Edward and Domick Hogan. The court did not pass immediate sentence, as in the case of Butler, but ata sentence, as in the case of Butler, but said he wanted a couple of days to look farther into their case. This settles all the cases of the train robbers with the eception of Jack King, who has been granted a continuance until next term. It was a general surprise here to hear Domick Hogan, the express messenger, plead guilty, as he was thought to be innocent, but the general impression now is that his sentence will be the most severe of the lot. The peculiarity of these cases is that the complicity of the express messenger made good the defense that the holding up of the Mineral Eange train and the stealing of \$75,000 was but larceny, and of that crime 000 was but larceny, and of that crime Butler was convicted.

Mexican Rebels Sack a Custom House and Take

POSSESSION OF LAS POLOMAS

If They Are Pursued-General Crook Asks for Troops.

DEMINO, N. M., Nov. 15.—News has just reached here of a serious revolution on the Mexican border, thirty miles to the south. Last week Mexican revolutionists to the number of 100 attacked the town of Las Polomas and sacked the customs house. After the raid the rebels fied to the mountains and were supposed to have gone south into the state of Guihuahua. Yesterday they again entered Las Polomas, driving the inhabitants and customs house officials across the line into the American town of Columbia. umbus. They then took possession of the town. The roads and passes leading from Polomas south to Ascension, a distance of over 100 miles, are in the hands of the revolutionists and all communication revolutionists and all communication with the interior, is cut off, no one being permitted to pass. Several Americans and Mexican citizens have been captured, but have thus far been released upon surrender of their horses and ammunition. The rebelsevince no desire to do bodily harm except to soldiers, and these they say they will kill on sight. Mexican troops have been sent from San Jose, near the city of Chihuahua, and are expected to arrive at the scene in two days.

Planned for Months. The rebels are strongly fortified in the hills and mountains of Reca Grande county, and are waiting to be attacked. They are well supplied with arms and ammunition and are prepared to fight ten times their number successfully. Large numbers of Mexicans have joined the rebels since the fort Polomas attack and their forces are conservatively estimated at 350. The conservatively estimated at 300. The revolution has evidently been planned for months. Small parties of Mexicans have been passing through Deming south for several weeks, and supplies of arms have been purchased at this point. General McCook has been telegraphed for to send United States troops to pro-tect property on this side of the line, and soldiers from Fort Bayard will go south temorrow. The situation is re-garded extremely serious. A considerable number of the discontents are encamped among the trees of Hermanos mountains on this side and camp fires and signal fires have been seen nightly. The rebels are well organized and under competent leadership. Considerable property be-longing to Americans has been de-stroyed at Las Polomas.

ANARCHISTS THROWING BOMBS. Panie Created in Barcelona and

Other Places. BARCELONA, Spain, Nov. 15.- The activity of the police in hunting down all anarchists has emboldened instead of frightening the terrorists. It is evident that they are only awaiting an opportunlty to commit further outrages. Last evening while-troops for Melilla were marching through the Plaza Real a number of workmen employed upon a private building discovered a thin trail of smoke ascending from one of the lower balconies of the house. They at first thought the building was on fire and made a rush to extinguish it.
Upon reaching the balcony they
found the smoke was caused by a
burning fuse attached to a large bomb. The fuse when discovered had burned within a few inches of the bomb, and in a few minutes more an explosion would

have resulted. The tire was quickly ex-

tinguished and the bomb placed in

charge of the police.

This is not the only outrage that the anarchists attempted yesterday. The district of Villanueva y la Geltru, on the Mediterranean, twenty-five miles southwest of Barcelona, was thrown southwest of barcelona, was thrown into a panic by an explosion that occurred in the town of Villanueva. Some persons last night placed a bomb by the gates of the barracks of the civic guard. An explosion followed that caused the greatest excitement and four men in the building reglated fear, and the men in the building rushed pellmeil for the open air. The gates of the barracks were blown off their hinges and carried a considerable distance. The walls of the building were cracked, doors were blown off and windows smashed. Nobody was hurt, but everybody in the vicinity was terribly frightened. The police have made a number of arrests on suspicion, but there is no positive evidence to con-nect any of those in custody with the explosion. It was only a short time ago the police found in this town a complete laboratory for the manufacture of explo-sives and hombs. sives and bombs.

Railway Treasurer Drake Beaten Insensitie by Two Men. Curcano, Nov. 15 - Daring robbers heat the tressurer of the Indiana Illi-

of the assault was J. A. Drake, treasurer of the "Three I's" road and the crime was committed in the company's office in the Rockery building. The money represented the semi-acouthly pay roll of the company. He drew the amount of the pay roll from the Illinois Trust & Savings bank yesterday afternoon and put the £21,000 in envelopes for distribution to each employs. Mr. Drake says he had just put the money packages in a hand bug and was stepping from the vanit, when he was seized with a vice-like grip sidewise around the body, and while his arms were pinioned by one robber, the second robber dealt him a stunning blow over the right temple with a slung shot. As he singgered, the robber who held him released his grip and struck his victim in the face twice with his flet. At the same time the robber with the slungshot hit Drake again over the forehead, felling him to the floor uncoencious. The robbers then abstracted the packages of money, and placing the satchel on a chair just outside the vanit, walked down stairs. Nothing has been seen of them since and the police have no clue which promises anything. Recovering consciousness he could not remember seeing the robbers spatch the money from his bag and he could only faintly describe the one who had used the slungshot. The clerks were put to work at once making out bank checks to duplicate the pay roll and the robbery.
